Product Profile

Introduction

Vector Fibre offers an ENNI (External Network-to-Network Interface) handover to be used for services on our next Generation stack.

This Vector Handover is designed to provide a simple versatile interface point between your network and the Vector Fibre network. The ENNI connects your Eclipse customers to your network.

The fibre handover acts as the external network-to-network interface located at the specified point of interconnection with Vector Fibre's network.

Business Benefits

Easy

Allows you to extend your network in Auckland by connecting to our established Vector Fibre network

Flexible

Select any major exchange or data centre in the Auckland area for your Vector Handover
